

Homeowners Structural Integrity Affidavit

Return to: Construction Development (Email: permits.callcenter@cityofalex.com / Fax: 318-473-1377)

Date: _____

Address: _____

Property Owner(s) Name: _____

Property Owner acknowledges that an existing concrete slab is proposed to be used for the erection of a replacement building (an auxiliary structure) to be used as a _____ behind an existing residence. The structure is not to be used for occupancy. No inspections will be performed by Construction Development to ensure the structural integrity of the slab to support the new structure.

Property Owner has been advised that a Licensed Structural Engineers opinion should be obtained prior to erecting a new structure on an existing slab, however, Homeowner instead wishes to accept all responsibility for the structural integrity and releases the City of Alexandria from any liability.

Property Owner acknowledges that a Conditional Certificate of Completion will be issued by COA once all other requisite inspections listed on the Building Permit are passed.
